The 23rd International Symposium on Wireless Personal Multimedia Communications (WPMC-2020) will be held in Okayama, Japan from October 18 - 21, 2020. The theme of this year's conference is "Body and Mind Integration through Information and Communication Technology". This event is co-hosted**************** and Okayama University.

The WPMC symposia series were inaugurated in 1998, as a global platform which aims at enabling collaboration in the field of wireless information. Held in Asia, Europe and America, WPMC has established itself as a unique global conference dedicated to wireless multimedia convergence. Continuing the series, the 23rd WPMC will bring together academia, industries and standardization bodies to explore activities, trends and future challenges towards ICT globalization for health and wellness issues in existing and future wireless technologies. GWS is the world's largest annual international conference on wireless techno-business modelling. It encapsulates the raw high-end technology and study of current market and trends to create and nurture future Businesses.

Main Topics of interest include, but are not limited to:

Wireless Communications and PHY
- Advanced modulation schemes
- Cognitive radio
- Cooperative communications
- MIMO/Massive MIMO channel models and channels
- Smart/ Reconfigurable antennas
- Ultra wideband, mmWave and sub-THz communications
- Visible Light Communications

Wireless Networks
- Ad-hoc networks
- Cognitive radio networks
- Cross-layer design
- Interference management
- IoT and M2M communications
- Localization for wireless networks
- Multimedia QoS, traffic management
- Spectrum sharing/coexistence
- Vehicular networks

Communications Services and Multimedia Applications
- Big data and data mining
- Cloud computing
- Emerging wireless and mobile applications
- Experimental trials and deployment
- Mobile multimedia services
- Mobile social networks
- Service oriented architectures

Security and Privacy in Communications
- PHY-layer Security
- Communication privacy and anonymity
- Network intrusion detection and prevention, firewalls, packet filters
- Malware, botnets and distributed denial of service
- Public key infrastructures, key management, credential management

A proposal for Special Sessions, Tutorials, Panel Sessions, and Round Table topics can be submitted to the special session chair before the deadlines. The session topics can be varied upon one's interest but still relate to the technical tracks.
